Power. Privilege. Justice.

Power is usually associated with violence and injustice. However, power can be used to achieve good goals, e.g. empowerment and participation. Racial justice, a critical appraisal of the colonial legacy and gender justice are the central issues to be discussed during the digital Study Day. These issues are pivotal for the cooperation of our churches and societies at the local and international level. Contributors from the 349 member churches from 110 countries are going to discuss these topics at the 11th Assembly of the World Council of Churches (30 August to 8 September 2022) in Karlsruhe, Germany. International guests will also give input at our Study Day.
